

## Campus Planning Committee Meeting Notes

Meeting Date: June 3, 2020

Members Present: Jerry Anthony, Liz Crooks, Matthew Edwards, Kristi Finger, Craig Just, Barbara Mooney

Others: Shawn Albaugh Kleppe, Joe Bilotta, Ben Fish, Flavia Hauss, Adele Vanarsdale, Chet Wieland, Debby Zumbach

---

### SUSTAINABILITY

Ben Fish, Associate Director of Utilities Operations, joined the meeting to talk about sustainability with regard to the Power Plant. He says renewable energy is getting more traction with solar and wind and then renewables. The electricity on the grid is getting cheaper, resulting in a greening of the grid, as he calls it. He mentioned that with Engie as a utility partner, we could have nation-wide offerings and more opportunity to expand the use of renewables, of which we are at 40% use this year.

Discussion included philosophical trust of campus users, self-generation for grid independence, grid redundancy, continued energy assessments of building with the Fault Detection and Diagnostic (FDD) program, and the future of the water plant.

### MASTER PLANNING PROGRESS

Joe gave a brief overview of the planning process, core values, neighborhood context, and framework plan. He then briefly went over the plans for Land Use, Open Space, Edges and Gateways, and Vistas and View Sheds.

Between now and next meeting, Joe would like committee members to review each of these and provide feedback to finalize these four framework plans.
