### **SOCCER COMPLEX FACILITY**

This project will construct a new two-story, 8,400 square foot facility to serve the UI women's soccer team, using the design-build delivery method.

The new soccer complex facility will be located at the mid-field along the west side of the existing soccer field on the Hawkeye Campus. This facility will include locker rooms, a training room, equipment storage, coach's office, team room, multi-purpose room, press box, filming platform and associated support spaces. This project will also include required site amenities such as roadway, sidewalks, utilities and landscaping.

The building will be metal clad taking cues from other structures in the area, bringing earth tones into this area of campus. A mockup will be constructed at the site and is available for committee members to view.

Committee members supported the current rendition of the design, knowing that slight modifications will occur during the design-build delivery of this project.

### **CAMPUS MASTER PLAN PROGRESS – ILLUSTRATIVE PLANS (continued)**

Continuing with the master plan progress, the illustrative plans for the North Side of the Main Campus were shared.

This neighborhood consists of Hancher, Levitt Center for University Advancement, and the former band practices field. The plan showed an imagined connection with the east side of campus via a new Hancher pedestrian bridge, leading into a park-like event area along the river, consideration for added parking facilities, and a residential-like build out by a third party of the band practice space.
