

Campus Planning Committee Meeting Notes

Meeting Date: November 8, 2021

Members Present: Sam Avery, Brian Baxter, Liz Crooks, Rick Fosse, David Hensley, Craig Just, Barbara Mooney

Others: Shawn Albaugh Kleppe, Charlie Anderson, Joe Bilotta, Kris Kluseman, Rod Lehnertz, Adele Vanarsdale, Debby Zumbach

BOYD LAW BUILDING

A proposal for changes to the windows in an existing student lounge and exterior terrace space on the 4th floor facing North was presented for consideration. The existing windows would be enlarged, and a window ribbon of similar windows would be added on the wall facing East.

Committee members expressed support for the window modification in this project.

MILITARY SCIENCE FACILITY – PLANNING AND PROGRAMMING

An update on program planning for a Military Science Facility was provided. Consideration is being given to combining the Army/Air Force ROTC and IVET programs into one facility more centrally located to campus, providing a presence and visibility with proximity to open space and classes. One site presented today is located just North of the Old Art Building.

Discussion included the challenges of the river, compatibility with the Art Campus as depicted in the master plan, use of the open space that is in great demand on campus, accessibility to the building for parking and drop-off, and impact on the view for Public Health.

This project will return to committee as programming transitions into design and when funding is secured.

MISCELLANEOUS

IMU Bridge – There were questions about the long-term plan for the bridge and historic scouring around one of the piers.

At this time, there are no major changes planned for this bridge aside from ongoing maintenance. The status of the historic scouring is unknown to CPC members.

Field House – A question about the long-term plan for the Field House was raised.

Recreational Services' programming and space needs are being evaluated, but nothing has been identified that would involve the Field House at this time.
