

Campus Planning Committee Meeting Notes

Meeting Date: February 15, 2022

Members Present: Sam Avery, Brian Baxter, Liz Crooks, Rick Fosse, Craig Just,
Lauren Lessing

Others: Shawn Albaugh Kleppe, Charlie Anderson, Joe Bilotta, Mike Kearns,
Adele Vanarsdale, Debby Zumbach

CPC MEMBERSHIP DESCRIPTION

Following up on Ms. Askling's request for an updated CPC member description for the Committee on Committee's website, a draft was shared for consideration.

Some minor adjustments were made, and Craig Just will update and forward back to Ms. Wendy for their use.

DONOR NAMING REVIEW

Joe Bilotta and Adele Vanarsdale provided a review of the naming process used by the Naming Committee as outlined in the Operations Manual Chapter 42, and how it comes to the Campus Planning Committee. This process is being evaluated for inclusion of non-philanthropic naming, honorific naming and rescinding a naming.

FUTURE OF WORK UPDATE

Joe Bilotta provided an update on data collected to this point as part of the Future of Work pilot. He remarked on the types of space most effected, and costs associated, such as operating costs and building renewal; the recommendation of the Space Committee to separate the policy from the space use; and the need to study the impacts on team cohesion.

Discussion included the cultural and departmental comparisons versus what is right for your specific program; asked the question about the Board of Regent's opinion on this subject; the use of space reclaimed from demolition; the future of leased space; and using the savings from changes effecting administrative units to invest in academic/research programs.

PHILIP G. HUBBARD

Craig Just shared the many contributions (below) of Philip G. Hubbard to the University of Iowa in celebration of Black History month.

Philip G. Hubbard

Research Engineer, Iowa Institute of Hydraulic Research (1954 – 1966)

Professor of Mechanics and Hydraulics (1954 – 1991)

UI Dean of Academic Affairs (1966 – 1971)

UI Vice President for Student Services (1971 – 1990)

Founder and Director of Opportunity at Iowa (1987 – 1990)

Phil Hubbard's life and career advanced the university for half a century. After receiving UI bachelor (Electrical Engineering), M.S. and Ph.D. (Mechanics and Hydraulics) degrees, he climbed academic ranks to professor. At IIHR, he developed innovative instrumentation and fluids data-acquisition techniques. Stepping into university administration, Hubbard led UI toward racial equality, thus reshaping its future. Praised for his mental agility and for being the first African-American in several administrative positions, including the first vice president in a Big Ten university, he is perhaps better remembered for his fine human qualities: his strong but kindly manner, and the patience, persistence, and leadership that he demonstrated as counsel to six UI presidents.
