

## Campus Planning Committee Meeting Notes

Meeting Date: October 10, 2022

Members Present: Robert Bork, Richard Fosse, Bryan Garter, Erin Litton, Scott Spak, Patrick Taylor, Ryan Westhoff

Others: Shawn Albaugh Kleppe, Charlie Anderson, Joe Bilotta, Mike Kearns, Rod Lehnertz, Erin Shane, Ed Scherrer, Adele Vanarsdale, Chet Wieland, Debby Zumbach

---

### STATE HYGIENIC LABORATORY – TEMPORARY WINTER SHELTER

A proposal to create a temporary enclosure at the North Main Entrance of the State Hygienic Laboratory under the overhang was presented. This location will be the public sample drop off until the current project modifying the loading dock space is complete. The paneling of the structure would mimic the building’s façade as best as possible in color and pattern.

Discussion included addressing snow and ice removal, potential drainage issues and clarification of “temporary.”

Committee members expressed support in this temporary enclosure.

### UIHC EMERGENCY POWER GENERATOR FACILITY EXPANSION

A proposal to expand the UIHC Emergency Power Generator Facility located at the Finkbine Parking Lot was presented. The proposal depicts an addition the same size as the current facility, a lighted driveway leading to a loading dock on the back side of the facility, and a façade copying the façade of the existing generator facility.

Discussion included collaboration with Athletics about view plain and landscaping; needs for sound baffling; and Mid-American Energy’s role as an energy provider.

Committee members supported this proposal as presented.

### WEST CAMPUS PARKING RAMP (HAWKEYE RAMP)

An update on the West Campus Parking Ramp was provided. The facility was proposed in the Campus Parking Master Plan done in 2020. The facility is being designed as a 3-bay, 5-level facility providing approximately 1000 parking spaces in a two-way configuration. The construction schedule is estimated at 18 months. Some of the many goals of this facility include safe and inviting parking, safe pedestrian access to/from WCTC and UIHC, secure bicycle storage, electric vehicle charging stations.

Discussion included the incorporation of any new parking technology when the primary users of the ramp is anticipated to be employees; landscape considerations; the potential of this facility being a node in a people mover concept; and applauding the goals of this multimodal facility.

IOWA WRESTLING TRAINING FACILITY NAMING

As part of the process for a major naming on campus, a proposal was shared that would name the new Iowa Wrestling Training Facility. With a generous gift funded by the Goschke Family, the new facility will be named the Goschke Family Wrestling Training Center.
